- k. Description of Request: Pacific Gas and Electric Company (licensee or PG&E) is requesting that its license for the Battle Creek Hydroelectric Project be amended to remove Inskip Diversion Dam, adjacent infrastructure, fish ladder, and approximately 30,000 to 56,000 cubic yards of sediment from behind the dam. No changes to long-term operations of the project are proposed. Erosion of the

sluiceway and dam toe present a continuing facility safety risk. Inskip Canal and Powerhouse are currently offline, and there are no plans to bring them back online. PG&E notified the Commission of its intent not to relicense the project and no other entity has expressed an interest in relicensing the project. Inskip Diversion Dam would be removed and the inlet into Inskip Canal from Inskip Diversion Dam would be plugged. Once stored sediment is dredged and the dam is removed, the stream channel would be restored to a natural condition. Restoration of the channel is proposed upstream of the existing dam and would be designed to include a series of pools and riffles/steps/cascades to provide channel bed stability. Bank stabilization and revegetation would be implemented within the work area to ensure long-term stability of the restored stream banks
